Accreditations

We are proud to be accredited with the Achilles Building Confidence Accreditation Scheme to Level 5, and CE Mark to Execution Class 3, demonstrating our industry-leading skills and commitment to quality management.

Services

We are proud of our specialist architectural metalwork services and can help your project with elegant staircases, balustrades and hand-rails, and general metalwork solutions. Our in-house design facilities and full project management team are able to create the most challenging designs while expertly managing every stage of the project.

PAD specialises in the full design fabrication and installation services for staircases, balustrades and handrails, and general metalwork.

With our many years of experience we can help meet the aesthetic, economic and functional requirements for all work undertaken. Working with the architect, PAD ensures that the design intent is maintained, even when budgets are tight.

PAD produce a wide range of general metalwork elements that are commonly required for back-of-house or industrial locations which typically include; open steel floors, fire escapes, factory access stairs, gates, barriers, security screens and many other bespoke elements such as bin stores, railings, guardrails, balustrades and handrails.
